Experience

Samsung Research America, Mountain View, CA · Samsung Knox · Senior Software Engineer

July 2022 – January 2026

- Added Zero Trust Network Access (ZTNA) support to Android devices, enabling improved network security for over 15,000 B2B customers.
- Designed and implemented a TLV (Type-Length-Value) communication protocol to enable secure configuration and network event communication between the Android framework and a ZT Agent.
- Prototyped a B2B indoor-navigation solution using Unity Augmented Reality and Real-Time Location Services to overlay indoor navigation instructions. Presented this product to upper management.
- Built auditing tools into the Android framework to detect printing events for B2B devices.
- Implemented framework-level URL interception for WebViews and Chrome Custom Tabs to detect and block phishing attempts, redirecting users to secure warning flows.
- Maintained and extended Knox Capture, an inventory tracking system.

Uber Technologies, San Francisco, CA · Customer Identity Platform · Software Engineer II

May 2018 – May 2022

- Developed and maintained core Android authentication and identity SDKs used across Rider, Driver, Eats, and other Uber applications on hundreds of millions of devices.
- Unified Sign-up & Login – Developed and migrated applications to a unified sign-up and login platform, consolidating identity systems across multiple Uber business verticals.
- OAuth 2.0 – Led OAuth integration across Android applications, replacing legacy API tokens and securing client-server communication at global scale.
- Opt-in 2FA – Zero-defect launch of Opt-In 2FA with SMS and TOTP used by tens of millions of users. Feature presented by CEO at a global road show in New York City.
- Email OTP & Phone/Email Verification – Flows and in-app nudging to increase rider email verification rate and driver mobile verification rate each by over 10%.
- Sole Android engineer on the Identity Management team for 6+ months of 2019, owning production stability, inbound requests, and feature delivery during a critical staffing gap.

TriplIt, SAP Concur, San Francisco, CA · Pre-Trip Experience · Mobile Software Development Intern
Summer 2017 (Jun – Aug)

- Rebuilt TriplIt Pro's most popular feature, Alternate Flights, used by 1M+ Pro users globally.
- Migrated app data layer from SQLite to Android Room, improving maintainability and reliability.

ThrowMotion, Sunnyvale, CA · Mobile Software Development Intern

January 2016 – June 2017

- Developed and shipped Android apps for connected tabletop games deployed in 5 countries.
- Designed a custom BLE (Bluetooth 4.0/Low Energy) protocol enabling real-time communication between the Android application and game hardware.

Cisco Systems, San Jose, CA · Software Development Intern

Summers 2013–2015

- Cisco Instant Connect (CIC) – Worked across US and overseas teams to develop an Android application to support real-time, cross-platform communication.
- Cisco Patient Connect (CPC) – Designed UX for various Patient Connect features, live in tens of thousands of hospital patient rooms in the country.
- Intellectual Property Central (IPC) Import Tool – Automated Linux open-source asset importing, saving days of manual work per OS release.

Safari Kid, Fremont, CA · Java Instructor

January 2013 – May 2014

- Prepared teaching plans and conducted training classes for Junior High School students.

Patents

- **#10,898,789** · Jan 26, 2021 · ThrowMotion Inc.
System and method for digitally connecting a network of physical games

Languages & Tools

- Mobile – Java, Android, Kotlin, Jetpack Compose, AOSP
- Security & Identity – ZTNA, OAuth 2.0, 2FA, Identity Management
- Tools – Git, Perforce, Bash
- Other – Unity, C#, C++, Python, JavaScript

Education

San Jose State University, San Jose, CA · B.S. Computer Science

May 2018 – GPA 3.5/4 – Dean's Scholar Award

Solving Big Data Problems · Database Management I & II · Introduction to Artificial Intelligence
